

Great Master of Ideology and Theory Representing the Independent Era

- 2022.2.13.

At the present moment when we mark with jubilation and deep emotions the Day of the Shining Star, a significant day of great auspicious event of our country and nation and a holiday common to humanity, our people and the progressive peoples of the world cannot repress their boundless reverence and yearning for Chairman **Kim Jong II**, who achieved great feats for accomplishing the independent cause of the popular masses with his outstanding ideological and theoretical activities.

There is every reason to believe that a genuine leader of the people gives birth to a great era by awakening people and leading them to the victory of revolution with a great idea.

Chairman **Kim Jong II**, who led our Party and people toward victory and glory with his brilliant wisdom and extraordinary political ability, is the greatest genius of the era who further developed and formulated the Juche-oriented theory on socialism with his energetic ideological and theoretical activities.

Chairman **Kim Jong II**, who long ago formulated and systematized the Juche idea, the great guiding idea of the independent era into Kimilsungism, published an immortal classic work “**On the Juche Idea**” on March 31, 1982, thus performed an immortal feat of thoroughly and perfectly proving that the revolutionary idea created by President **Kim Il Sung** is the integrated Juche system of idea, theory and method.

With this classic work, the anti-imperialist national liberation fighters of the world and the peoples of the developing countries who wandered about directionless could have the most correct guide to the fundamental principle of human life and to carving out the destiny of humanity, and the 20th century could shine as an independent era, the Juche era, both in name and reality.

In the early 1990s when the socialist red flags were pulled down in some countries due to the opportunists and renegades of socialism and when the imperialists were driving dark clouds of isolation and suffocation over our Republic daring to deny the socialist ideal itself, Chairman **Kim Jong II** proved the ideological basis of the socialist cause and the inevitability of its triumph, thus to deliver a death blow to the hostile forces.

Chairman **Kim Jong II** published his immortal works “**Abuses of Socialism are Intolerable**”, “**The Historical Lesson in Building Socialism and the General Line of Our Party**” and “**Socialism is a Science**”, thereby proving on a scientific basis that socialism which is the just cause of the popular masses will surely emerge victorious.

These are not all. Chairman **Kim Jong II**, in the whole process of his great revolutionary lifetime, formulated great ideologies and theories including the philosophy of single-hearted unity, the philosophy of red flag and the philosophy of comradeship which give the most powerful stimulus to the socialist construction. This is a momentous event which demonstrated to the whole world the force of traction, justness and vitality of the socialist cause.

Indeed, the great ideological and theoretical feats achieved by Chairman **Kim Jong II** became a foundation stone of eternal value and a dynamic motive power which ensured that our country could greet a turning point of adding luster to the new era of self-reliance and prosperity and that our people could advance vigorously along the road of socialism.

Everlasting is the history of the Sun.

We will further display the political and ideological might of our socialist country which stands in dignity by independence and is strong and steady with the great idea, under the wise leadership of respected Comrade **Kim Jong Un**, who inherits as it is the revolutionary idea of Chairman **Kim Jong Il** and translates his patriotic desire for building a powerful country into a brilliant reality on this land.

The Supreme Incarnation of the Lofty Sense of Moral Obligation

- *2022.2.13.*

The immortal history of the external revolutionary leadership of the great Comrade **Kim Jong Il** is inscribed with an emotional picture of warming the hearts of all people by his revolutionary faith and noble sense of moral obligation.

During his visit to the Russian Federation in August, 2001, the great Comrade **Kim Jong Il** paid his respects to the Lenin Mausoleum for the first time as the top Head of State after collapse of the Soviet Union.

Red Square in Moscow was in an atmosphere of indescribable solemnity.

Stepping on the pavement shining in the midsummer light, the great Comrade **Kim Jong Il** approached the Lenin Mausoleum and paid a high tribute to him after adjusting the ribbon hanging from the wreath put down by the Russian guards of honor.

The visit to the Lenin Mausoleum by the great General on the day served as a solemn declaration of the history that socialism has never been collapsed and that the achievements of Lenin would also remain forever in the hearts of the world people.

One of the Russian newspapers emphasized that August 4 when Comrade **Kim Jong Il** paid his respects to the Lenin Mausoleum can be seen as the day when the world realized once again that there is nobody except for Comrade **Kim Jong Il** of the DPRK who is the most ardent communist and the great leader of the world socialist movement. It continued to say that the day was the one of finding a savior of the Lenin Mausoleum which has been disgraced by all the reactionaries of the history and that the day marked an event of firming up confidence that the socialist movement would surely emerge victorious only when it follows the leader like Comrade **Kim Jong Il**.

Many newspapers and broadcasts of the world also bannered the event of that day saying that the leader of the socialist cause of the 21st century paid tribute to the pioneer of the socialist cause of the 20th century, "**Kim Jong Il** fervor" blown in Red Square swept the planet.

The great Comrade **Kim Jong Il** is indeed a genuine revolutionary and the supreme incarnation of the noble sense of moral obligation who held in high esteem the great Comrade **Kim Il Sung** as the eternal sun, and properly appreciated and firmly safeguarded the exploits of the leaders of the world working class as well.

Story of Love Told with New Year's Days

- 2022.2.1.

Lunar New Year's Days are celebrated big in many countries as folk festivals since they bring us recollection of the past one year together with new hopes for the coming year.

Whenever lunar New Year's Day comes, it is a common practice for everyone to enjoy the holiday with their families, full of optimism and joy. On the contrary, sadness of having lost parents wells up on this day for the children without parents.

But there is no discrimination between children with parents and children without them among the children celebrating the lunar New Year's Day on this land.

Hereunder is an emotional story told with the lunar New Year's Day.

10 years ago, respected Marshal **Kim Jong Un**, who visited Mangyongdae Revolutionary School on the lunar New Year's Day, warmly said that he found himself here to meet the parentless children who would weep missing the great General **Kim Jong Il**, and that he would celebrate the holiday together with them, becoming their parents.

Respected Marshal **Kim Jong Un** visited the school, even putting off his rest of the New Year's Day, to remove the shadow in the clear eyes of the parentless children who were yearning for the great General **Kim Jong Il**. Looking up to him, children of the school could see image of the great General who had visited the school in the New Year 1997 being exposed to large flakes of snow.

The look of the children throwing themselves into the bosom of respected Comrade **Kim Jong Un** was just like being embraced into their long-awaited father.

Story of love told with New Year's Day is also imprinted in the morning of the New Year 2015.

On this day, respected Comrade **Kim Jong Un** visited the Pyongyang Baby Home and Children's Home. He warmly said he would enjoy the New Year's Day together with the children, saying that he was so much eager to see children yearning for affection once he had wished all the children of the country brighter future in his New Year Address.

Not only our people but the whole world could hardly refrain from expressing high praise looking at the emotional look of the children who competed with each other to be embraced by him saying they looked forward to seeing him and saying proudly that a new palatial house built by Marshal **Kim Jong Un** is indeed to their liking.

"Not adults but innocent children are shedding unaffected tears following so faithfully their leader. These tears enable us to envision the future of Korea. DPRK is really the world for children. We truly saw the acme of love for the coming generation."

A Wonderland of Love Where the Future of Talent Flowers

- 2022.1.27.

Today, various and comprehensive preschool education such as calligraphy, fast reading, paduk(*go*) and vocal music is on a high tide in our country, in order to find and grow talents according to tastes and aptitudes of the children.

Great efforts are devoted to the development of intellectual faculties of the children and to their early education in many kindergartens across the country such as Changgwang Kindergarten, Kyongsang Kindergarten, and Taedongmun Kindergarten, bringing up a great number of world-class musical prodigies and little young talents gifted with distinguished abilities.

There is one noteworthy thing here.

It is that the preschool education is not provided to specific kindergartens only, but it is provided in various ways to all the kindergartens of the country in the urban and rural areas and in the mountainous and plain areas, suited to the regional characteristics without any difference between the central and local areas.

True to the noble will of the respected Comrade General Secretary to open up the future of the prosperous and powerful country by developing our education into the most advanced and ideal one to which we can reliably entrust the future of the country, all the kindergartens of the country are competing with each other to grow up prodigies by applying systematic selection and proper education methods in due consideration of the talents and aptitudes of the preschool children.

Whichever kindergarten you may go, you can hear sound of musical prodigies singing songs and playing musical instruments reverberating from the sunlit windows. You can also find talents who are possessed with excellent calligraphic and fine art skills as well as young little graders of Takwondo and paduk which are permeated with the spirits of the nation.

Superb aptitude does not immediately develop into talent.

From the olden times, a flower tended by a gardener is more beautiful. Likewise, our children are fulfilling their dreams and hopes to their hearts' content under the grateful socialist system and excellent educational environment that find good aptitude in time and show tender loving care to it, lest its buds fade away.

This is the reality of this land, a wonderland of love where the world-shaking talents of the children are flowering.

Dreams and Hopes Guaranteed by State Policy

- *2022.1.27.*

The latest 4th Plenary Meeting of the 8th Central Committee of the Workers' Party of Korea (WPK) successfully reviewed the start of the great change and advance in the socialist construction. The policy of love for the coming generation adopted at the Meeting has touched the hearts of all people of the country, drawing worldwide attention.

Special measures for the coming generation are continuously taken at every important meeting which discusses the political affairs of the Party and the state in our country. Yet an important measure was again taken at the Meeting to provide, at the state's expense, all the students across the country with new-style, high-quality school uniforms and bags.

Such world-surprising reality is inconceivable apart from the love of General Secretary **Kim Jong Un** who has made the supply of new school uniforms a policy, saying that it should be a must, not affected by the financial availability.

It is reportedly estimated that in the world, more than 1.2 billion children are forced into miserable life because of the armed conflicts and poverty, 123 million children are deprived of the right to learning, 1 out of 10 children is forced into child labor, and 1 billion children are suffering from violence and maltreatment...

As these statistics illustrate, those children are fated to find themselves on the battlefields in militant uniforms rather than go to school in school uniforms, and to leave their beloved homeland and wander around carrying refugee packages instead of schoolbags in their prime time of learning.

These are the miserable scenes of the children – a commonplace in any part of the present world.

By contrast, in socialist Korea, the state makes the children's precious dreams come true under its responsibility, taking the place of the tens of millions of parents.

On this land, all the children are bringing their beautiful dreams into blossom by carrying our lovely schoolbags and using stationery with brand names like "Sonamu" (pine tree), "Mindulle" (dandelion), "Haebaragi" (sunflower) and "Durumi" (crane), thanks to the warm love of the great father who takes whatever burdens and pains for the coming generation even in the face of global health crisis.

Our country is globally envied and lauded as a paradise for children where the precious dreams and hopes of the coming generation are fully guaranteed by the eternal state policy under the endless and benevolent love of our dear father.

Mysterious Secret, Excellent Fruition

- *2022.1.19.*

People would not believe that 8-year-old school children do sums on addition and subtraction of three- or four-digit numbers which are displayed at 1-second intervals in the twinkling of an eye while singing, dancing and writing a composition at the same time.

It would be more surprising if you heard that children could do sums on addition and subtraction of double-digit numbers read by teachers and hear common chords in a flash while explaining about the robot of their own making in Chinese, English and Russian all at the same time.

Even those who saw with their own eyes the surprising calculation of the children at Segori Primary School under the Pyongyang Teacher Training College find it difficult to readily believe their skills.

Asked about the secret of such surprising skills, the teachers proudly answer that they are the fruition of the 12-year free and compulsory education system and the unique policy of giving priority to primary and secondary education that became to be effectuated by respected Comrade **Kim Jong Un**.

Respected Comrade **Kim Jong Un** said that like a firm-rooted tree can bear good fruits, for good talents to be made, it is necessary to intensify primary and secondary education which give basic education, and to invent and introduce new methods of our own style for developing

intellectual faculties of children which can be applied in the days of kindergartens and primary schools when the human brain is developed on the most active basis.

He also clarified in detail the orientation and methods for developing the future-oriented education in conformity with the reality of rapid increase in the amount of information and knowledge as well as the global trend of attaching importance to sustainable development of education and capacity-building education.

The experts of Pyongyang Teacher Training College came to pay attention to abacus in the course of deepening their study true to the teachings of respected Comrade **Kim Jong Un**.

Abacus, one of the handicraft calculation tools had been widely used in our country and other Asian countries for a long time before it disappeared with the advent of electrical calculator and computer.

The experts brought their attention to the fact that the abacus is highly effective in developing right hemisphere of the children's brain. With this point in mind, they invented the method of developing intellectual faculties of children through the abacus game and proved its advantage after introducing them to the students and children of the schools and kindergartens under the Pyongyang Teacher Training College.

If abacus education is given, it will help create a faculty in the brains which can imagine the abacus board and the up and down movement of abacus balls thanks to combination of repeated movement of two hands and the calculating process of the four rules of arithmetic.

If such a faculty is further strengthened, children can be possessed of high capacity to process information which can receive, preserve and reproduce a lot of information in a short time.

Drawing on the mysterious secret found in the simple calculation tool, the experts created one after another dozens of advanced methods of our own style for developing intellectual facilities such as the virtual reality technology, the augmented reality technology and the robot education technology so as to generalize them throughout the country. Such an effort bears excellent fruits.

Like this, thanks to the extraordinary and energetic leadership of respected Comrade **Kim Jong Un**, our Juche-oriented education continues to make a rapid progress as required by the new century. This itself provides a sure guarantee for the bright future of our country.

The Most Important Policy of Our Republic

- *2022.1.17.*

At the 4th Plenary Meeting of the 8th Central Committee of the Workers' Party of Korea where the direction of the works of the Party and the state in 2022 is discussed and decided, respected Comrade **Kim Jong Un** said that the Party and the state remain unchanged in their policy to supply all the schoolchildren in the country with school uniforms and stationery at state's expense. And he set forth a task for supplying every schoolchild with high-quality uniforms and new-style bags, and saw to it that the Party Central Committee took an important measure for its implementation.

Such a decision could only be made by respected Comrade **Kim Jong Un**, who set it as the eternal policy of our Republic to make it unconditional as the first priority if it is for the good of the coming generation, and continues to carve his great statesmanship of love for posterity.

Whenever we look back upon the traces of love for posterity engraved by respected Comrade **Kim Jong Un** on this land, we can never forget forever his great dedication to our posterity.

The education revolution in the new century declared with the introduction of the universal 12-year compulsory education system, the noble benevolent affection permeated in Pyongyang Maternity Hospital, Okryu Children's Hospital and Pyongyang Teacher Training College, the stories of love for posterity associated with *Mindulle*(Dandelion) Notebook Factory, Pyongyang Bag Factory and Pyongyang Children's Foodstuff Factory, the happy laughter of children resounding in children's camps, baby homes, children's homes, primary and secondary boarding schools which have been built splendidly all over the country, the new childcare policy formulated in the period of manifold difficulties...

Each and every year passed, which is filled with warm affection and love unknown to the world, clearly shows that our sons and daughters are indeed living under a benevolent care of the father.

Entire people on this land are enjoying a harmonious life helping and leading one another forward in the world of love and in the sea of humanity unfolded by respected Comrade **Kim Jong Un**. Because of this, they are singing over the century the song of happiness, the paeon to the era of the Workers' Party of Korea, saying "Our father is Marshal **Kim Il Sung**, our home is the embrace of the Party."

No wonder even foreign friends who heard the news on the Plenary Meeting of the Party Central Committee praise highly that "Politics of the DPRK run through with the people-centered idea and childcare-centered idea," and that the "DPRK is the only country where the state provides the schoolchildren with free education and even with school uniforms and stationery."

In fact, boundless is the fervent love of respected Comrade **Kim Jong Un** shown to our posterity.
