

A Great Temple of Learning for All the People

This is the Sci-Tech Complex, a great temple of learning for all the people and a multi-functional hub of scientific and technological dissemination. It is on Ssuk Islet in the capital city of Pyongyang.

It is an energy-saving building and the green environment of its interior and exterior is on a high level.

The exterior of the complex is in the shape of a large atomic structure symbolizing the world of science.

The pen-shaped tower symbolic of science and technology, the sailboat-shaped lodgings, the open-air sci-tech exhibition ground and the fountain park are in good harmony with the complex.

On every floor of the four-story complex there are e-reading rooms and indoor sci-tech exhibition halls of all sectors. There are also new book reading halls, online lecture rooms, rooms for scientific discussions and a hall of children's dream.

A nationwide network for dissemination of science and technology with the Sci-Tech Complex at the centre has been established in the Democratic People's Republic of Korea.

Many students, schoolchildren and working people visit the Sci-Tech Complex almost every day to store up knowledge.
