

The Most Important Policy of Our Republic

• 2022.1.17.

At the 4th Plenary Meeting of the 8th Central Committee of the Workers' Party of Korea where the direction of the works of the Party and the state in 2022 is discussed and decided, respected Comrade **Kim Jong Un** said that the Party and the state remain unchanged in their policy to supply all the schoolchildren in the country with school uniforms and stationery at state's expense. And he set forth a task for supplying every schoolchild with high-quality uniforms and new-style bags, and saw to it that the Party Central Committee took an important measure for its implementation.

Such a decision could only be made by respected Comrade **Kim Jong Un**, who set it as the eternal policy of our Republic to make it unconditional as the first priority if it is for the good of the coming generation, and continues to carve his great statesmanship of love for posterity.

Whenever we look back upon the traces of love for posterity engraved by respected Comrade **Kim Jong Un** on this land, we can never forget forever his great dedication to our posterity.

The education revolution in the new century declared with the introduction of the universal 12-year compulsory education system, the noble benevolent affection permeated in Pyongyang Maternity Hospital, Okryu Children's Hospital and Pyongyang Teacher Training College, the stories of love for posterity associated with *Mindulle*(Dandelion) Notebook Factory, Pyongyang Bag Factory and Pyongyang Children's Foodstuff Factory, the happy laughter of children resounding in children's camps, baby homes, children's homes, primary and secondary boarding schools which have been built splendidly all over the country, the new childcare policy formulated in the period of manifold difficulties...

Each and every year passed, which is filled with warm affection and love unknown to the world, clearly shows that our sons and daughters are indeed living under a benevolent care of the father.

Entire people on this land are enjoying a harmonious life helping and leading one another forward in the world of love and in the sea of humanity unfolded by respected Comrade **Kim Jong Un**. Because of this, they are singing over the century the song of happiness, the paean to the era of the Workers' Party of Korea, saying "Our father is Marshal **Kim Il Sung**, our home is the embrace of the Party."

No wonder even foreign friends who heard the news on the Plenary Meeting of the Party Central Committee praise highly that "Politics of the DPRK run through with the people-centered idea and childcare-centered idea," and that the "DPRK is the only country where the state provides the schoolchildren with free education and even with school uniforms and stationery."

In fact, boundless is the fervent love of respected Comrade **Kim Jong Un** shown to our posterity.

Dreams and Hopes Guaranteed by State Policy

• 2022.1.27.

The latest 4th Plenary Meeting of the 8th Central Committee of the Workers' Party of Korea (WPK) successfully reviewed the start of the great change and advance in the socialist construction. The policy of love for the coming generation adopted at the Meeting has touched the hearts of all people of the country, drawing worldwide attention.

Special measures for the coming generation are continuously taken at every important meeting which discusses the political affairs of the Party and the state in our country. Yet an important measure was again taken at the Meeting to provide, at the state's expense, all the students across the country with new-style, high-quality school uniforms and bags.

Such world-surprising reality is inconceivable apart from the love of General Secretary **Kim Jong Un** who has made the supply of new school uniforms a policy, saying that it should be a must, not affected by the financial availability.

It is reportedly estimated that in the world, more than 1.2 billion children are forced into miserable life because of the armed conflicts and poverty, 123 million children are deprived of the right to learning, 1 out of 10 children is forced into child labor, and 1 billion children are suffering from violence and maltreatment...

As these statistics illustrate, those children are fated to find themselves on the battlefields in militant uniforms rather than go to school in school uniforms, and to leave their beloved homeland and wander around carrying refugee packages instead of schoolbags in their prime time of learning.

These are the miserable scenes of the children – a commonplace in any part of the present world.

By contrast, in socialist Korea, the state makes the children's precious dreams come true under its responsibility, taking the place of the tens of millions of parents.

On this land, all the children are bringing their beautiful dreams into blossom by carrying our lovely schoolbags and using stationery with brand names like "Sonamu" (pine tree), "Mindulle" (dandelion), "Haebalagi" (sunflower) and "Durumi" (crane), thanks to the warm love of the great father who takes whatever burdens and pains for the coming generation even in the face of global health crisis.

Our country is globally envied and lauded as a paradise for children where the precious dreams and hopes of the coming generation are fully guaranteed by the eternal state policy under the endless and benevolent love of our dear father.
